Hi folks. For our mtg this afternoon on ephemeral waters/diffuse surface waters, wastewater effluent channels, and the approval process for SSC & DU revisions, I've compiled a bunch of info to help our discussion (see attached). It may look a little daunting because there is a bunch of code language pasted in there, but that's just for reference if needed—I've summarized the main points that I gleaned from all that code language under the "Summary" arrows. I'll bring hard copies for DNR folks.

Kristi
